Impresa en los Talleres Gráficos RUIROMER
Depósito Legal B - 30029 - 1971

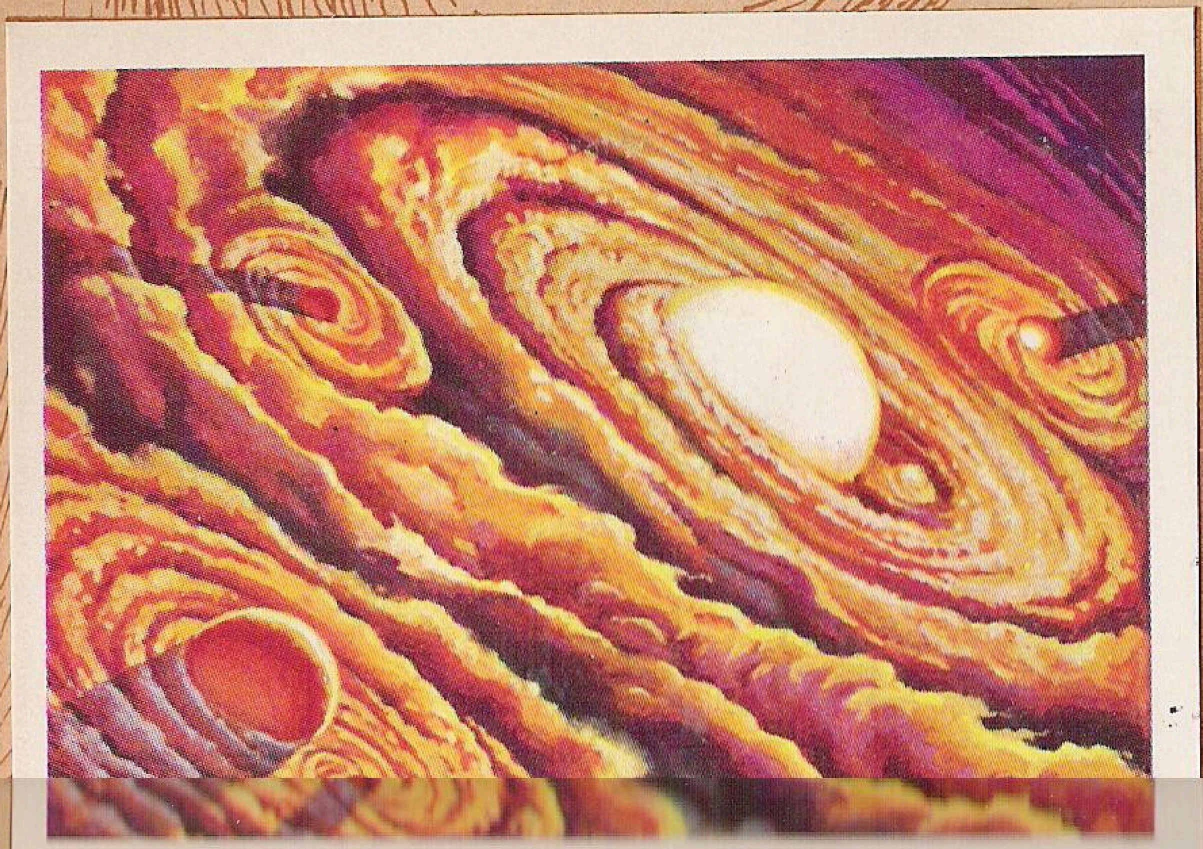

De la mano de la Ciencia, con ayuda del Arte, vamos a emprender el más maravilloso de los viajes: el viaje al pasado. Pero no a un pasado fácil, asequible, que pudiera decirse se encuentra al alcance de la mano, sino a un pasado que se remonta nada más y nada menos que a la friolera de unos 10.000 millones de años, cuando la Tierra no era Tierra, cuando los planetas no eran planetas, cuando lo que hoy vemos, aún ni siquiera había sido esbozado.

El origen de nuestro mundo, el origen de la vida, el origen del hombre, lo veréis plasmado en maravillosos cromos a todo color, explicado en textos sencillos y comprensibles, para que, sin daros cuenta, poco a poco, siguiendo las huellas de la Creación, halléis respuesta a esa serie interminable de preguntas que cada cual se hace deseoso de averiguar cómo se inició todo, qué principio tuvo el mundo que nos rodea.

Este es en síntesis el viaje que vamos a emprender. En las páginas siguientes todo es acción multicolor, acción vibrante, acción real. Estamos seguros de que ninguno de vosotros, amables lectores coleccionistas de esta serie de cromos, se sentirá defraudado, porque no hay nada más apasionante y más cuajado de inmenso interés, que la Aventura de la Vida.

Pasad la página... y ¡adelante!... Mejor dicho, ¡hacia atrás!
